SENIOR SOFTWARE ENGINEER – BACKEND (JAVA)

Java | Spring Boot | Microservices | Kafka | Distributed Systems

PROFESSIONAL SUMMARY

Senior Java Backend Engineer with **4+ years of experience** designing, building, and owning **scalable, secure, and high-availability backend systems** in product and startup environments. Strong expertise in **Java (8–21), Spring Boot, and microservices architecture**, with hands-on experience in **event-driven systems using Apache Kafka**. Proven ability to drive **backend ownership, system design decisions, performance optimization, and production stability** for finance, reporting, and analytics platforms. Experienced in **code reviews, mentoring engineers, and leading backend delivery with accountability**.

CORE SKILLS

Backend & Architecture

Java (8–21), Spring Boot, Microservices, REST APIs, System Design, Distributed Systems, Event-Driven Architecture

Messaging, Caching & Performance

Apache Kafka, WebSocket, Apache Ignite, Redis, Performance Optimization, High-Availability Systems

Security & Data

JWT Authentication, OAuth 2.0, Role-Based Access Control (RBAC), Hibernate / JPA, SQL, Oracle

Cloud & Delivery

AWS (EC2, S3, RDS, IAM), Docker, CI/CD (Jenkins, SonarQube), Maven, Agile (Scrum)

Leadership

Backend Ownership, Technical Design Discussions, Code Reviews, Mentoring Engineers

PROFESSIONAL EXPERIENCE

PROOUNCE SOLUTIONS PVT. LTD.

Senior Software Engineer – Backend (Java / Spring Boot)

Hyderabad, India | Apr 2025 – Present

- Own backend design and development of multiple microservices supporting **finance and reporting platforms**.
- Design and develop **high-availability backend services** using Java (11/17) and Spring Boot, ensuring scalability and maintainability.
- Build secure REST APIs implementing **JWT-based authentication, OAuth, and RBAC** aligned with enterprise security standards.
- Design and implement **event-driven backend workflows using Apache Kafka** to enable asynchronous processing and service decoupling.

- Improve application performance through **distributed caching strategies** using Apache Ignite and Redis.
- Develop **real-time backend features using WebSocket** for live updates and notifications.
- Solve complex platform-level challenges including **global time-zone standardization** and **configuration-driven session management**.
- Design and maintain **scheduled and batch processing workflows** using Quartz Scheduler and Spring Scheduler.
- Act as **backend module owner** by leading technical design discussions, conducting code reviews, mentoring engineers, and enforcing clean architecture practices.
- Collaborate with frontend, QA, DevOps, and product teams to deliver end-to-end features.
- Support production deployments, monitor applications, and resolve **critical production issues with ownership and accountability**.

Software Engineer

Hyderabad, India | Apr 2024 – Apr 2025

- Owned and enhanced backend services for a **Reporting and Analytics system** using Java, Spring Boot, and Hibernate/JPA.
- Built and maintained RESTful APIs with a strong focus on **performance, security, and maintainability**.
- Worked extensively with **Oracle SQL**, writing optimized queries and handling transactional data for reporting use cases.
- Contributed to **microservices-based architecture**, following clean coding and design principles.
- Supported debugging, testing, and production issue resolution in collaboration with senior engineers.

Junior Software Engineer

Hyderabad, India | Oct 2022 – Apr 2024

- Implemented backend modules using Java, Spring Boot, and Spring MVC.
- Developed REST APIs and integrated services using JSON-based communication.
- Worked with Hibernate/JPA and SQL for CRUD and transactional operations.
- Assisted in bug fixes, code reviews, and API documentation using Swagger.

Software Engineer Trainee

Hyderabad, India | Jul 2022 – Oct 2022

- Gained hands-on experience in Core Java, Spring Framework, and REST API development.
- Built sample backend services and learned enterprise development practices.

- Assisted in testing, debugging, and documentation activities.

Naresh i Technologies

Full Stack Java (Training)

Hyderabad, India | Jan 2022 – May 2022

- Completed structured training in **Core Java, Spring Framework, Hibernate, and REST API development.**
- Built basic backend applications to understand MVC architecture, database integration, and API workflows.

EDUCATION

Bachelor of Engineering

Savitribai Phule Pune University | 2018 – 2021
